

UN WORLD

ENVIRONMENT DAY

India is hosting an event on the theme **#beatplasticpollution** on World Environment Day, June 5th, 2018. To mark this day, we at TTC, have taken a pledge to reduce plastic from our lives.

Problems?

10%

The amount, Plastic waste contributes to the total waste generated in the world.

50%

of plastic waste is single-use or disposable.

25,000

tonnes

The amount of plastic waste India produces every day, with Delhi contributing the most to this waste. (9600 tonnes)

Some Solutions

#1

Carry cloth or paper bags for buying groceries to avoid getting disposable bags from the store

#2

Use reusable cutlery made from eco-friendly materials such as bamboo and steel

#3

Use glass or copper bottles to reduce usage of one time use plastic bottles

#4

Segregate plastic and non-plastic waste

#5

Reuse milk or juice glass bottles

#6

Use natural/organic products

Plastic has evaded our lives and contributed a great deal to environmental degradation. This World Environment Day, let's all do our bit to reduce plastic pollution and help create a better, more ecologically sound world!
